

Mac N-Central Installation

Guide for installation of the N-Central agent on Green Chef systems.

Uninstall any previous versions of the Agent

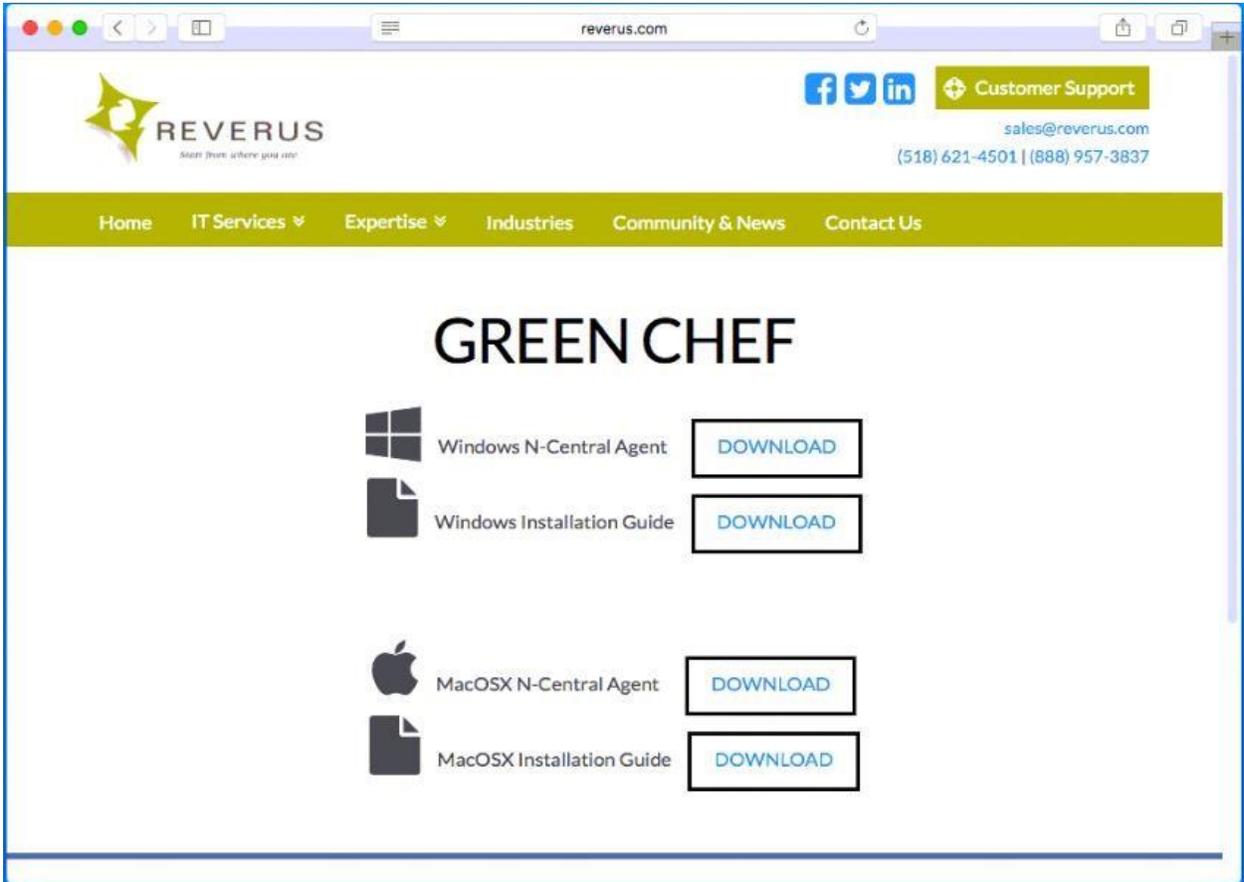

Click on the Finder (blue and white face) icon of your Dock and, within the new window that opens, go to Applications (left-hand side)

Scroll through and if you see **N-agent**, drag-and-drop it into your Trashcan on the Dock. Type your password when prompted to complete the uninstall.

Navigate to the Deployment Website

<https://www.reverus.com/greenchef>

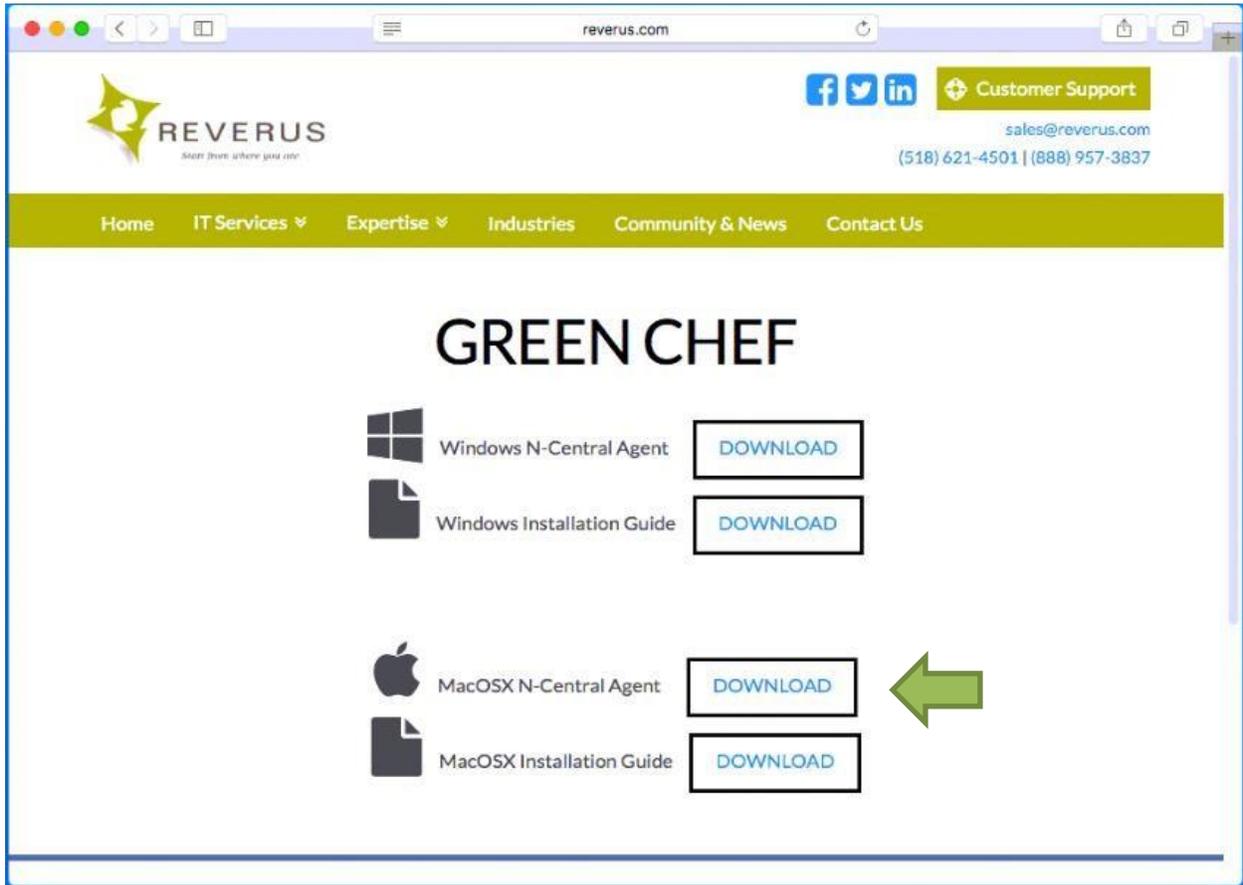

The screenshot shows a web browser window displaying the REVERUS website. The browser's address bar shows "reverus.com". The website header includes the REVERUS logo, social media icons for Facebook, Twitter, and LinkedIn, and a "Customer Support" button. Below the header is a navigation menu with links for "Home", "IT Services", "Expertise", "Industries", "Community & News", and "Contact Us". The main content area features the heading "GREEN CHEF" and four download links:

- Windows N-Central Agent (with Windows logo icon) [DOWNLOAD]
- Windows Installation Guide (with document icon) [DOWNLOAD]
- MacOSX N-Central Agent (with Apple logo icon) [DOWNLOAD]
- MacOSX Installation Guide (with document icon) [DOWNLOAD]

Select Download Mac OSX N-Central Agent

This will start the download of the agent to your computer.

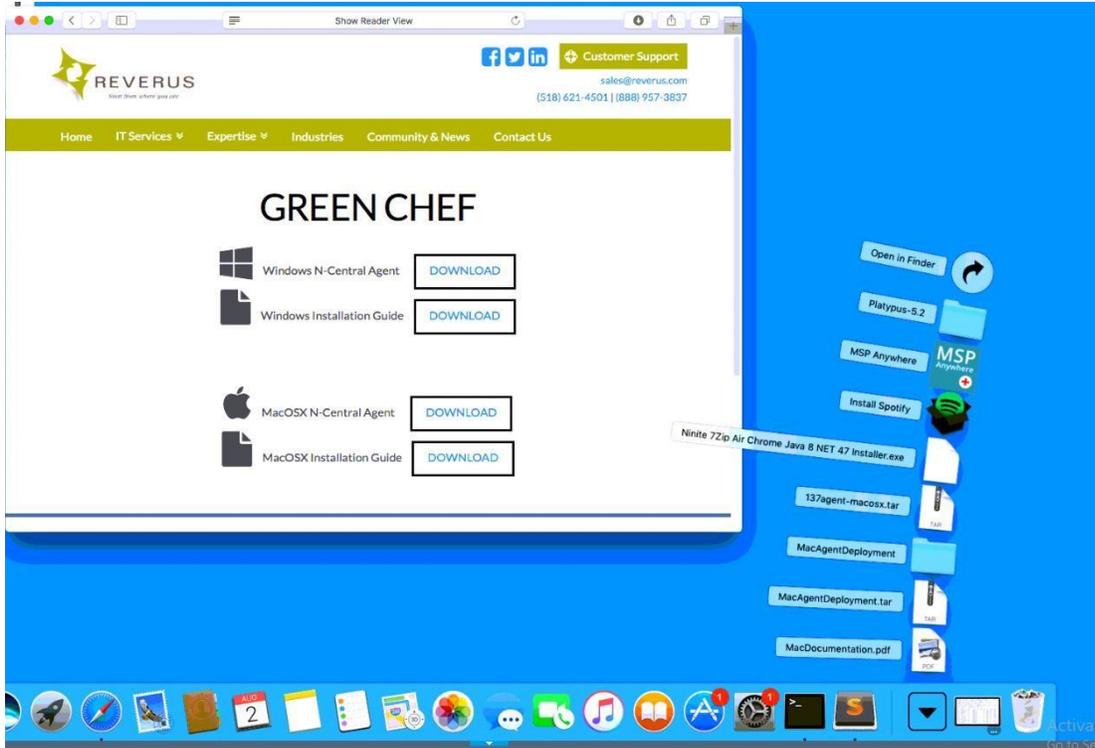

The screenshot shows the REVERUS website interface. At the top, there is a navigation bar with links for Home, IT Services, Expertise, Industries, Community & News, and Contact Us. The main content area is titled "GREEN CHEF" and features four download options:

- Windows N-Central Agent (with a "DOWNLOAD" button)
- Windows Installation Guide (with a "DOWNLOAD" button)
- MacOSX N-Central Agent (with a "DOWNLOAD" button, highlighted by a green arrow)
- MacOSX Installation Guide (with a "DOWNLOAD" button)

The website also includes a "Customer Support" button and contact information: sales@reverus.com, (518) 621-4501 | (888) 957-3837.

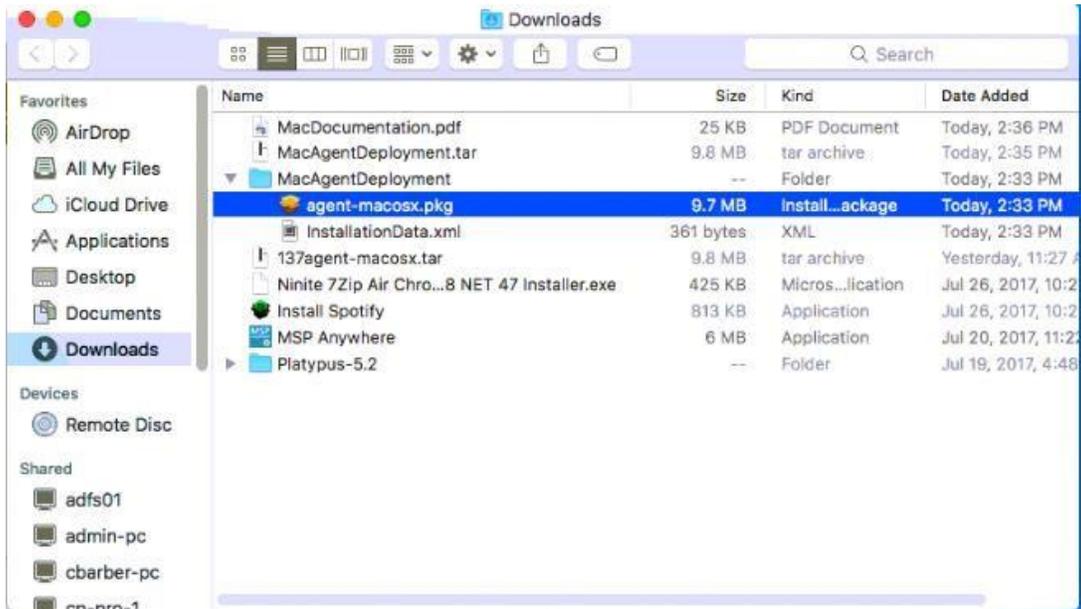

Unzip the tar file

Click on the Downloads Icon on your Mac Dock

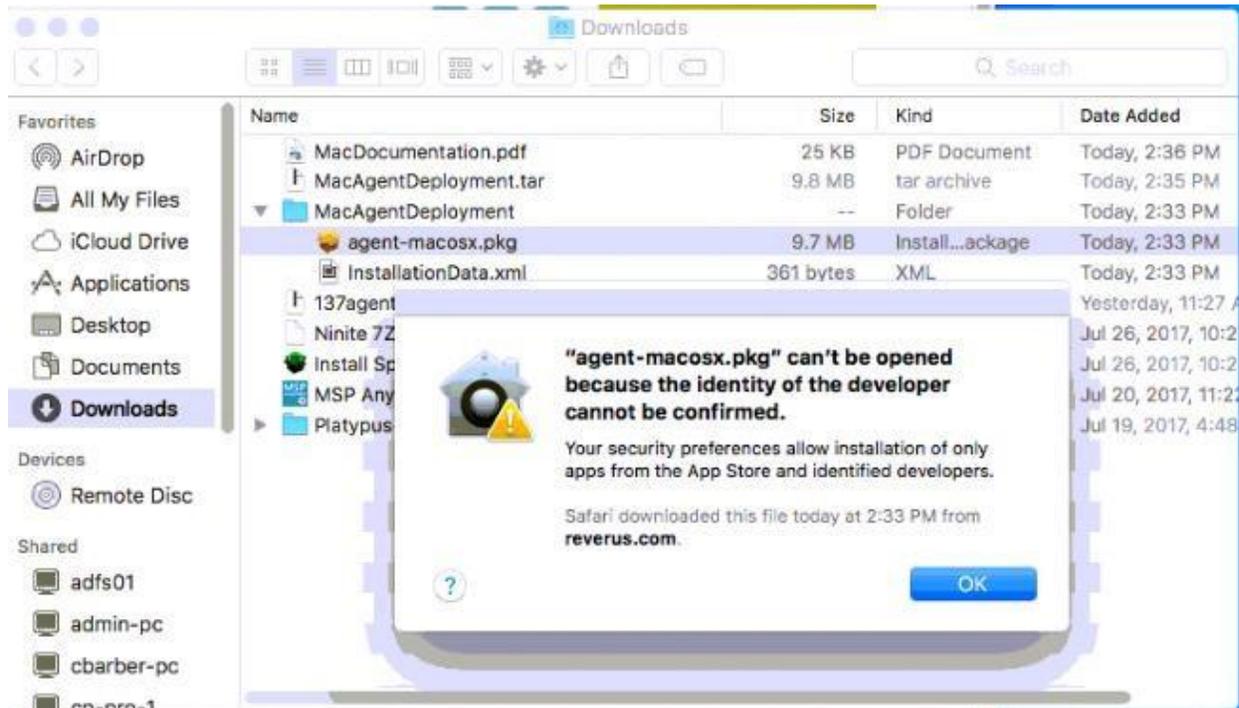

Click on MacAgentDeployment.tar

This will unzip the file and open the downloads folder to show the unzipped folder “MacAgentDeployment.”

Start Installation

Open the MacAgentDeployment folder, and then double click on agent-macosx.pkg An error will pop up stating that the .pkg came from an unconfirmed developer.

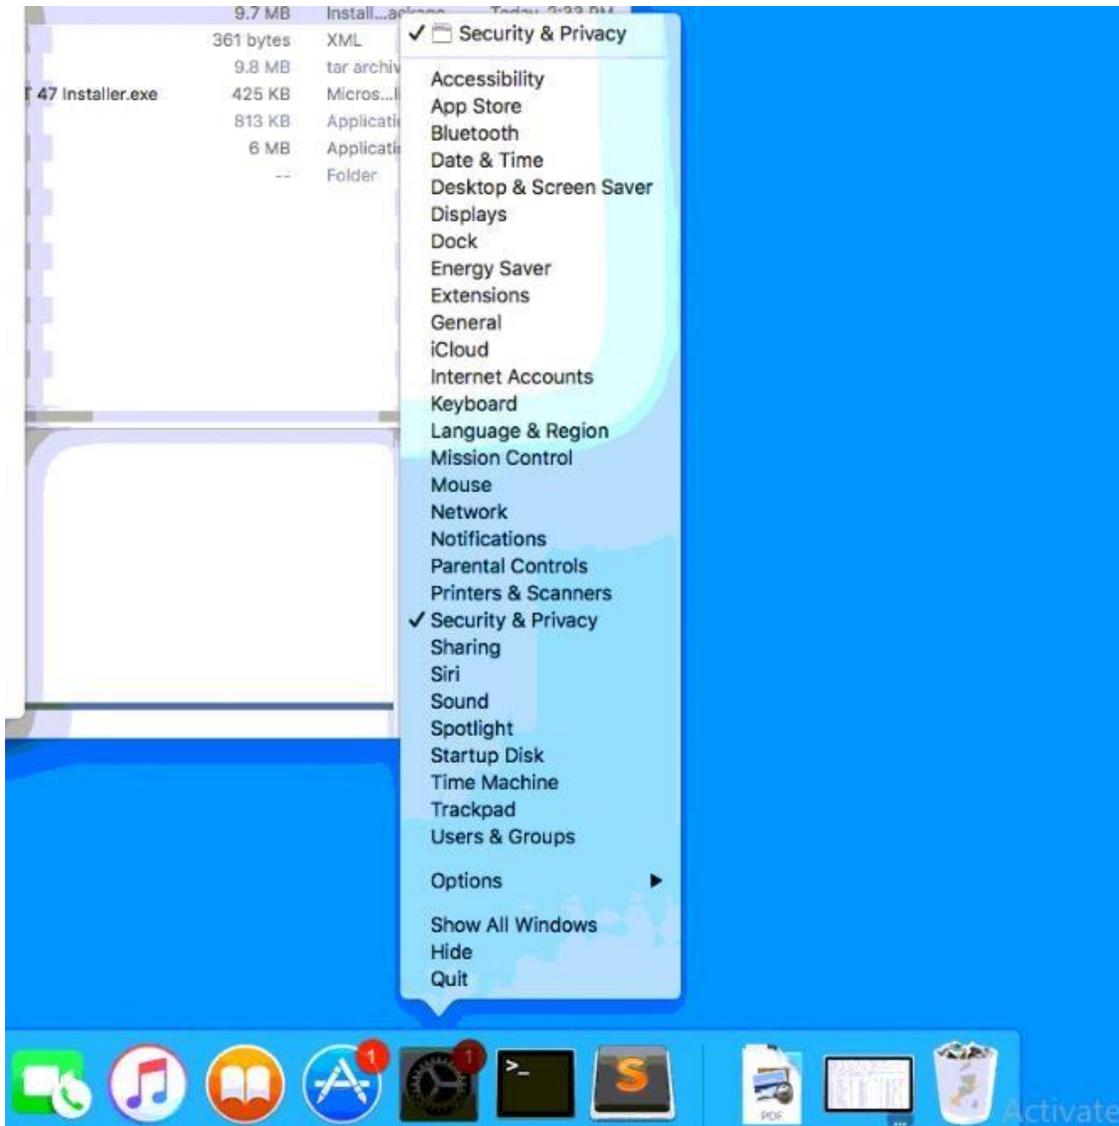

Select OK and immediately go to the next step

Allow Install

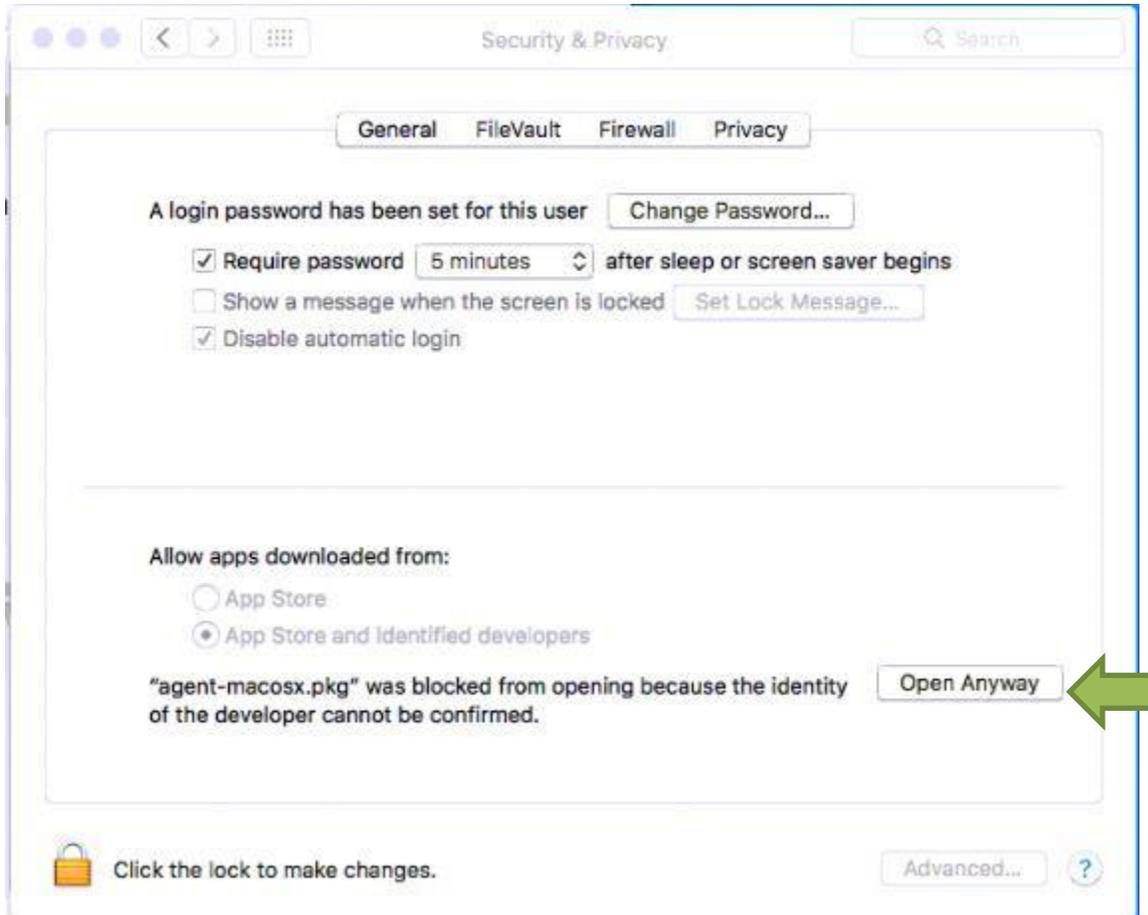

On the Dock, right click on the Systems Preferences icon and select Security & Privacy

If you do not have System Preferences on your Dock, click on the Apple icon of your Menu bar in the top-left, then click System Preferences.

Go to the General Tab inside Security and Preferences

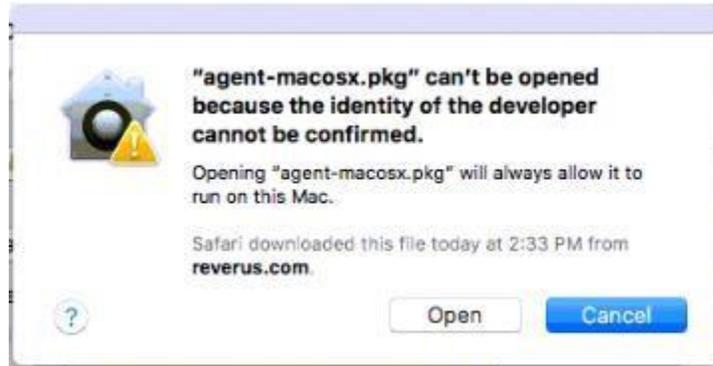

If your computer throws this error, select view downloads. Otherwise skip to “Start Install Process”

Select Open Anyway

Open Package

A new window will appear select open

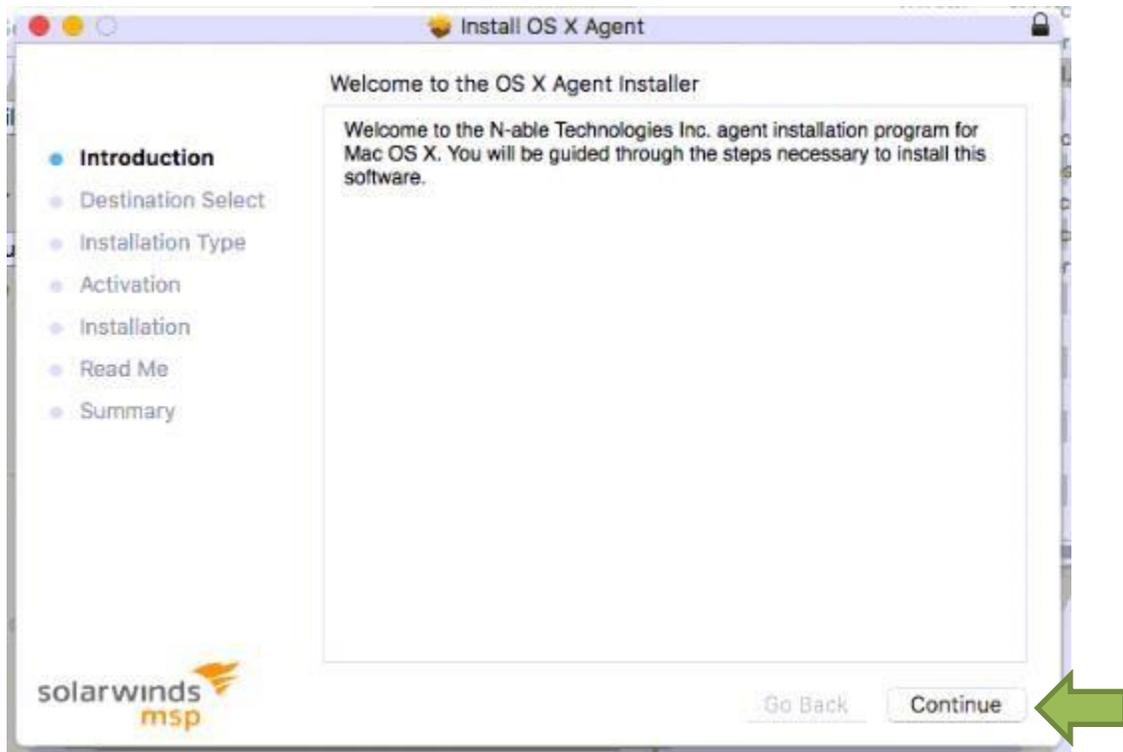

Start Installation
